

CONTROLLER

Our client is a 164-bed community hospital in Northeast Texas. This financially stable hospital is in the midst of a major capital expansion project including a new cancer center, medical office building and major in-hospital services expansion. The senior leadership team requires a controller to join their team and assist in the continued transformation of this community hospital into a regional medical center of excellence.

Reporting to the Chief Financial Officer, the Controller directs Accounting, Payroll and Accounts Payable.

Required:

- Bachelor's in Accounting or related degree
- Four (4) years of accounting experience
- Two (2) years of supervisory experience in hospital accounting or a hospital audit setting
- Prior experience with Texas hospital reimbursement, including DSH reporting

Preferred:

- Current CPA licensure
- MBA or graduate degree in accounting or a related field
- Knowledge of grant accounting
- Prior experience in installing payroll and materials management information system modules
- McKesson is helpful but not required.

Our client is offering a very competitive base salary and benefit program and will pay for relocation expenses. This family oriented community offers a very high quality of life at a very reasonable cost of living. Take advantage of great schools, great location, and recreational opportunities including seven area lakes!
